Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group II in the reply filed on 7/30/07 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 15, 16, 31 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mir, U.S. Patent 6,296,751.

The Mir patent discloses the claimed method and apparatus comprising a flow channel including only cation exchange material (see abstract). The patent further teaches that the cation exchange material can be placed next to the anion membrane, wherein the patent teaches that water splitting occurs at the interface of the anion membrane with a cation material (see abstract and col. 4, lines 28-31). The patent further teaches one can use the various membranes and layers in the concentrating channels in electrodeionization to "provide even further improvements in reduced scaling (see col. 4, lines 37-41).

Accordingly, the invention as a whole would have been obvious to one having ordinary skill in the art to modify the disclosure of the Mir patent with the teachings contained there, because the patent teaches that one having ordinary skill in the art could through routine experimentation provide further improvements in reduced scaling by the appropriate selection of membranes and resin or layers.

Conclusion
